Department Description

The UCSF Pediatric Critical Care Resource Team (CCRT) provides nursing coverage to the Pediatric Critical Care units at the Mission Bay campus. This is a float position, overseeing the care of patients within the 58 bed level IV ICN, the 20 bed PICU, the 18 bed Pediatric Cardiac ICU and the 12 bed Cardiac Transitional Care Unit. The CCRT nurses are adaptable, taking on challenging assignments and providing staffing coverage where they are needed the most. Our CCRT critical care specialists are cross trained in caring for PICU, ICN and Cardiac patients and work closely with different interprofessional teams. Being part of the CCRT is an amazing opportunity to join a highly skilled and dynamic team of nurses who are making a difference for our most critical pediatric patients and their families.

Required Qualifications

- Two years recent RN experience in Pediatric Critical Care (PICU, NICU or Peds CICU)
- Active licensure as a Registered Nurse in the State of California
- Active American Heart Association CPR Certification
- Active American Heart Association PALS Certification
- Active NRP Certification; or within six months from first working day
- The flexibility to orient and work at all UCSF Health locations.

Preferred Qualifications

- Two years recent RN experience in Pediatric Critical Care, or in an Intensive Care Nursery setting; or one year current RN experience in a Pediatric Critical Care paired with previous Pediatric experience consisting of three years.
- BSN

License/Certification

- Active licensure as a Registered Nurse in the State of California
- Active American Heart Association CPR Certification
- Active American Heart Association PALS Certification
- Active NRP Certification; or within six months from first working day
